

Safety Data Sheet

Cadmium Lemon Oil Stick

Product Code: BH-CA0005

Department: kama oil sticks

C.A.S. : 8024-09-7, 67746-08-18048-07-5, 7727-43-7

KAMA
PIGMENTS

Section: 1 Identification

| | |
|----------------------|--|
| Product name | Kama Pigments Artists oil sticks |
| material use | Fine Art Painting |
| Uses advised against | No specific uses advised against are identified. |
| Manufacturer | Kama Pigments Artists' materials 7442 St-Hubert, Montreal, Québec, H2R2N3 Canada https://www.kamapigment.com |

Section: 2 Hazard Identification

Our artists paints are not classifiable as hazardous according to ghs (osha,clp,whmis) hazard Classification criteria

| | |
|-----------------------|---|
| Physical hazards | Not Classified |
| Health hazards | Not Classified |
| Environmental hazards | Not Classified |
| Label elements | None necessary |
| Other hazards | This product is intended for use by adults. |

HGS Label Elements

Signal Word

GHS Classification

The product does not require a hazard warning label in accordance with GHS criteria.

Hazard Statements

H302 Harmful if swallowed.

Precautionary Statements

P264 Wash skin thoroughly after handling.
P270 Do not eat, drink or smoke when using this product.
P273 Avoid release to the environment.
P301 + P312 + P330 IF SWALLOWED: Call a POISON CENTER or doctor/ physician if you feel unwell.
Rinse mouth.
P501 Dispose of contents/ container to an approved waste disposal plant.

Section: 3 Composition / Information on Ingredients

Product is a mixture linseed oil waxes and pigments with no reportable components except :

Product name: Cadmium pigment
chemical composition:

| components: | cas no. | % |
|--|------------|--------|
| As mixtures, all colors may contain (see note 1): | | 25-100 |
| C.I pigment red 108 – cadmium sulfoselenide red | 58339-34-7 | |
| C.I pigment orange 20 – cadmium sulfoselenide orange | 12656-57-4 | |
| C.I pigment yellow 35 - cadmium zinc sulfide yellow | 8048-07-5 | |
| C.I pigment white 21 – barium sulfate (see note 2) | 7727-43-7 | 0-30 |

note 1: these substances are specifically excluded from the specific classification and labelling entries in the ghs table covering cadmium compounds. they have been self-classified by the producer as not hazardous on the basis of their physical and chemical properties – particularly their extreme insolubility. a risk assessment conducted by the eu concluded that these products offer no significant hazard to either human health or the environment. their reach registration has confirmed that no classifications apply – either for human health or the environment.

note 2: barium sulfate is present in extended / reduced strength (lithopone-like) pigments/colors. it may also be present at lower levels in cadmium “pure” type pigments to control strength to customers’ standards

Section: 4 First-Aid Measures

| | |
|--------------|---|
| Eye contact | Immediately flush eyes with plenty of water, occasionally lifting the upper and lower eyelids. Check for and remove any contact lenses. Get medical attention if irritation occurs. |
| Inhalation | Remove victim to fresh air and keep at rest in a position comfortable for breathing. Get medical attention if symptoms occur. In case of inhalation of decomposition products in a fire, symptoms may be delayed. The exposed person may need to be kept under medical surveillance for 48 hours. |
| Skin contact | Flush contaminated skin with plenty of water. Remove contaminated clothing and shoes. Get medical attention if symptoms occur. |
| Ingestion | Wash out mouth with water. Remove victim to fresh air and keep at rest in a position comfortable for breathing. If material has been swallowed and the exposed person is conscious, give small quantities of water to drink. Do not induce vomiting unless directed to do so by medical personnel. Get medical attention if symptoms occur. |

Most important symptoms/effects, acute and delayed

Potential acute health effects

| | |
|--------------|--|
| Eye contact | No known significant effects or critical hazards. |
| Inhalation | Exposure to decomposition products may cause a health hazard. Serious effects may be delayed following exposure. |
| Skin contact | No known significant effects or critical hazards. |
| Ingestion | No known significant effects or critical hazards. |

Indication of immediate medical attention and special treatment needed, if necessary

Notes to physician In case of inhalation of decomposition products in a fire, symptoms may be delayed. The exposed person may need to be kept under medical surveillance for 48 hours.

Specific treatments No specific treatment.

Protection first-aiders No action shall be taken involving any personal risk or without suitable training.

Section: 5 Fire-Fighting Measures

| | |
|--|---|
| Suitable extinguishing media | Use an extinguishing agent suitable for the surrounding fire. |
| Unsuitable extinguishing media | Do not use a water jet as a fire extinguisher, as this will spread the fire. |
| Specific hazards arising from the chemical | In a fire or if heated, a pressure increase will occur and the container may burst. |
| Hazardous thermal decomposition products | Decomposition products can include the following carbon dioxide, carbon monoxide, nitrogen oxides, halogen compounds, harmful gases or vapors. |
| Special protective actions for fire-fighters | Promptly isolate the scene by removing all persons from the vicinity of the incident if there is a fire. No action shall be taken involving any personal risk or without suitable training. |
| Special protective equipment for fire-fighters | Fire-fighters should wear appropriate protective equipment and self-contained breathing apparatus (SCBA) with a full face-piece operated in positive pressure mode. |

Section: 6 Accidental Release Measures

| | |
|--|---|
| Personal precautions | No specific recommendations. For personal protection, see Section 8. |
| Environmental precautions | Avoid discharge into drains or watercourses or onto the ground. |
| Methods and material for containment and cleaning up | Reuse or recycle products wherever possible. Absorb spillage to prevent material damage. Flush contaminated area with plenty of water. Wash thoroughly after dealing with a spillage. Dispose of contents/container in accordance with local regulations. |

Section: 7 Handling And Storage

| | |
|--|--|
| Personal precautions | No specific recommendations. For personal protection, see section 8. |
| Environmental precautions | Avoid release to sewers, waterways or on the ground. |
| Methods and material for containment and cleaning up | Reuse or recycle products as far as possible. Absorb spill to prevent material damage. Rinse the contaminated area with plenty of water. Wash thoroughly after dealing with a spill. Dispose of contents / container in accordance with local regulations. |

Section: 8 Exposure Control/Personal Protection

| | |
|----------------------------------|---|
| Occupational exposure limits | None. |
| Appropriate engineering controls | Good general ventilation is recommended but not not mandatory. |
| Individual protection measures | |
| Hygiene measures | Wash hands, forearms and face thoroughly after handling, before eating, smoking and using the lavatory and at the end of the working period. Appropriate techniques should be used to remove potentially contaminated clothing. Wash contaminated clothing before reusing. |
| Eye/face protection | Safety eyewear complying with an approved standard should be used when a risk assessment indicates this is necessary to avoid exposure to liquid splashes, mists, gases or dusts. If contact is possible, the following protection should be worn, unless the assessment indicates a higher degree of protection: safety glasses with side shields. |
| Skin protection | Use barrier creams to prevent skin contact. |
| Hand protection | Chemical-resistant, impervious gloves complying with an approved standard are recommended. |

Section: 9 Physical and Chemical Properties

| | |
|---------------------------|--|
| Appearance | Wax-like colored sticks of various colors. |
| Odour | wax-like Characteristic. |
| pH | Not applicable. |
| boiling point | >240 °C |
| melting point | 55-70 °C |
| Flash point | >205 °C CC (Closed cup). |
| Relative density | 0.90 - 1.3 @ 20 °C |
| Solubility | Insoluble in water |
| Auto-ignition temperature | >300 °C |

Section: 10 Stability And Reactivity

| | |
|------------------------------------|--|
| Reactivity | There are no known reactivity hazards associated with this product. |
| Chemical stability | Stable at normal ambient temperatures and when used as recommended. |
| Possibility of hazardous reactions | No potentially hazardous reactions known. |
| Conditions to avoid | None known. |
| Materials to avoid | No specific material or group of materials is likely to react with the product to produce a hazardous situation. |
| Hazardous decomposition products | Does not decompose when used and stored as recommended. Thermal decomposition or combustion products may include the following substances: Harmful gases or vapours. |

Section: 11 Toxicological Information

| | |
|----------------------------------|---|
| Toxicological effects | Not regarded as a health hazard under current legislation. |
| Acute toxicity - oral LD50 | Based on available data the classification criteria are not met. |
| Acute toxicity - dermal LD50 | Based on available data the classification criteria are not met. |
| Acute toxicity - inhalation LC50 | Based on available data the classification criteria are not met. |
| General information | No specific health hazards known. The severity of the symptoms described will vary dependent on the concentration and the length of exposure. |

Section: 12 Ecological Information

| | |
|-------------------------------|---|
| Toxicity | Not regarded as dangerous for the environment. However, large or frequent spills may have hazardous effects on the environment. |
| Persistence and degradability | The degradability of the product is not known. |
| Bioaccumulative potential | Not available. |
| Other adverse effects | No known significant effects or critical hazards. |

Section: 13 Disposal Considerations

| | |
|------------------|--|
| Disposal methods | <p>The generation of waste should be avoided or minimized wherever possible. Disposal of this product, solutions and any by-products should at all times comply with the requirements of environmental protection and waste disposal legislation and any regional local authority requirements.</p> <p>Waste packaging should be recycled. Incineration or landfill should only be considered when recycling is not feasible. This material and its container must be disposed of in a safe way.</p> <p>Empty containers or liners may retain some product residues. Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers.</p> |
| Waste class | waste paint and varnish. |

Section: 14 Transport Information

| | |
|----------------------|--|
| Land transport (DOT) | Not classified as dangerous in the meaning of transport regulations. |
| Air transport (IATA) | Not classified as dangerous in the meaning of transport regulations. |
| Sea transport (IMDG) | Not classified as dangerous in the meaning of transport regulations. |
| ADR/RID | Not classified as dangerous in the meaning of transport regulations. |

Section: 15 Regulatory Information

This product has been classified in accordance with the hazard criteria of the CPR and GHS and the MSDS contains all the required informations.

| | |
|-----------------------------|--|
| Proposition 65 (California) | This product contains a chemical known to the State of California to cause cancer. For more information go to www.P65Warnings.ca.gov . |
|-----------------------------|--|

Section: 16 Other Information

| | |
|-----------------|---|
| Training advice | Read and follow manufacturer's recommendations contained in this SDS. |
|-----------------|---|
